Clinical Research

- Integrated platform to support translational research
- Initiated by Johnson & Johnson et Recombinant 6 years ago
 - PI: Eric Perakslis
- Open-source since January 24th , 2012
- Installed at HEGP Hospital, Paris since May, 2012
- Today, driven and maintained by the tranSMART

2014	PCORI PRRN Phelan-McDermid Syndrome Data Network	Academic US grant	Development

Objectives :

1. **Integration** of clinical, biological and ‘omics data in one place – hypothesis free –
2. Generation of **hypothesis** by Clinicians / Researchers

→ integration
↔ analysis

Autism cohorts

Phenotype data

- Simons Simplex Collection (SSC) 2,760
- AGRE 3,300
- Autism Consortium (AC) 525

- Gene-Pheno studies – Lou Kunkel - HMS
 - Pre AC
 - AC
 - SSC

Raw data

RNA

SSC (928)

Blood (Kunkel-Kohane)

- Affymetrix Gene ST 1.0 316
- Affymetrix U133+2 19
- Illumina HiSeq 154

LCL (Geschwind)

- Illumina REF-8 3.0 439

AC (166)

Blood (Kunkel-Kohane)

- Affymetrix Gene ST 1.0 117
- Affymetrix U133+2 21
- Illumina HiSeq 28

BCH (386)

Blood (Kunkel-Kohane)

- Affymetrix Gene ST 1.0 186
- Affymetrix U133+2 168
- Illumina HiSeq 32

AGRE (1,048)

LCL (Geschwind)

- Illumina REF-8 3.0 1,048

DNA

- Static genomic predisposition
 - Goal: enable streamlined analysis of genomic variation at **any *functional unit* resolution**
 - Single variant / variant type
 - Single gene
 - Gene set / pathway
 - Regulatory module
 - Cellular system
 - Genomic location / context
 - ...
- Measurement types

Raw genotyping array data by cohort

DNA

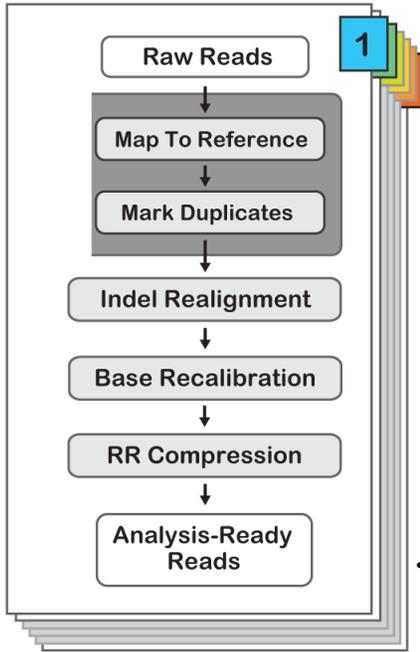

- SSC (**3,184**)
 - Illumina Infinium1M
 - Illumina 1M Duo
- AC (**60**)
 - Affymetrix SNP 6.0
- AGRE (**3,832**)
 - Affymetrix 10K
 - Affymetrix 500K
 - Illumina HumanHap550
 - Illumina Infinium 1M

WHOLE EXOME SEQUENCE data by cohort

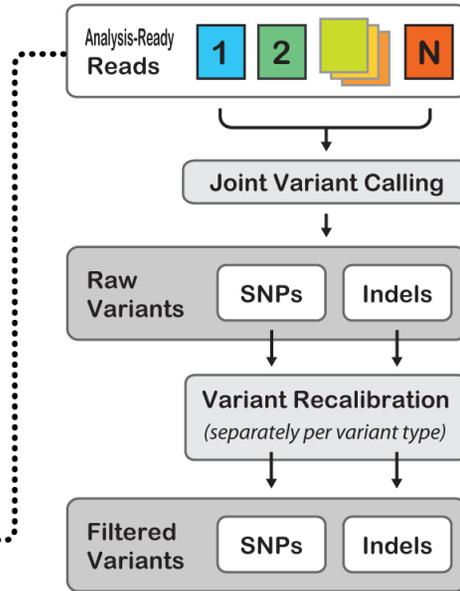

- SSC (**2,963**)
 - State **914**
 - Illumina GAllx
 - Illumina HiSeq
 - Eichler **676**
 - Illumina GAllx
 - Illumina HiSeq
 - Wigler **1373**
 - Illumina HiSeq
- AC (**381**)
 - Daly **381**
 - Illumina HiSeq
- AGRE (**1672**)
 - Walsh **750**
 - Illumina HiSeq
 - BI-BCM **922**
 - Illumina HiSeq

PCORnet

\$95 million

Start date Jan 2014

18 months

PCORI PPRN Grant

- Phelan-McDermid Syndrome Data Network
 - PI: Megan O’Boyle, Mother of PMS patient
 - Co-PI: Paul Avillach, MD, PhD
- Total: \$1M
- 18 months
- To collect **all available patient data** from Phelan-McDermid Syndrome (PMS) patients to make meaningful, well-annotated clinical data available to researchers and to share insights with members of the PCORI network

Health care providers

Contact and retrieve EMR clinical notes from their Health care providers

Patients / Parents

PPRN: Phelan-McDermid Syndrome Data Network (PMS_DN)

➡ Already in place
➡ PCORI - PPRN project

Collaboration with Clinical Data Research Networks (CDRN) - PCORI

For example:
Scalable Collaborative Infrastructure for a Learning Health System (SCILHS) to find new patients with **Phelan-McDermid Syndrome** across all their network of 9 Hospitals

Individual patient data entry including clinical notes

Patient ownership and governance of data

Aggregated or individual patient data consultation

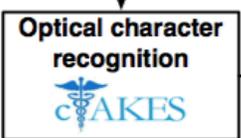

Researchers

Omics' data

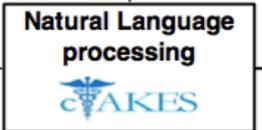

Firewall

Images of Clinical Notes

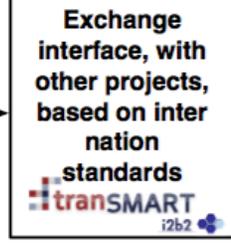

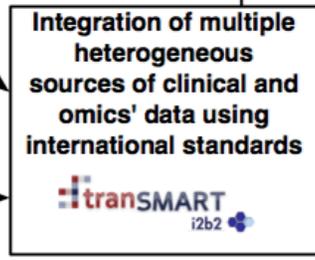

Textual Clinical Notes

Clinical data from Registry

Anonymized curated Clinical data from Clinical notes

Harvard Medical School Research Computing Private Orchestra: **Phelan-McDermid syndrome research environment**

Sentences

Patient 1

1 - There is a history of **gallstone** pancreatitis in the patient's sister.PAST MEDICAL HISTORY:

Patient 2

1 - She has had similar episodes couple of years ago and was told, at one point, that she had **gallstones**, but after her pregnancy, a repeat ultrasound was done, and apparently was normal, and nothing was done at that time.

Patient 3

1 - She does not recall renal calculi, nor **cholelithiasis**, denies asthma, emphysema, pneumonia, tuberculosis, sleep apnea, home oxygen use.

Patient 4

1 - **Cholelithiasis.3.**

2 - Please note evaluation of the abdominal organs is secondary to the lack of intravenous contrast material.**Gallstones** are seen within the gallbladder lumen.

Apply Validation

2 patients with gallstones

No: It's Sister's history

OK

No it's a Negation

OK

Analysis

Cohorts

Subset 1: (Public Studies\EGP0001\Biomarker Data\Non Omics\Mutation Detection\KRAS Mutation\NA)

Analysis: Survival Analysis ?

Variable Selection ?

Time

Select time variable from the Data Set Explorer Tree and drag it into the box. For example, "Survival Time". This variable is required.

...Delai survie globale\

Category

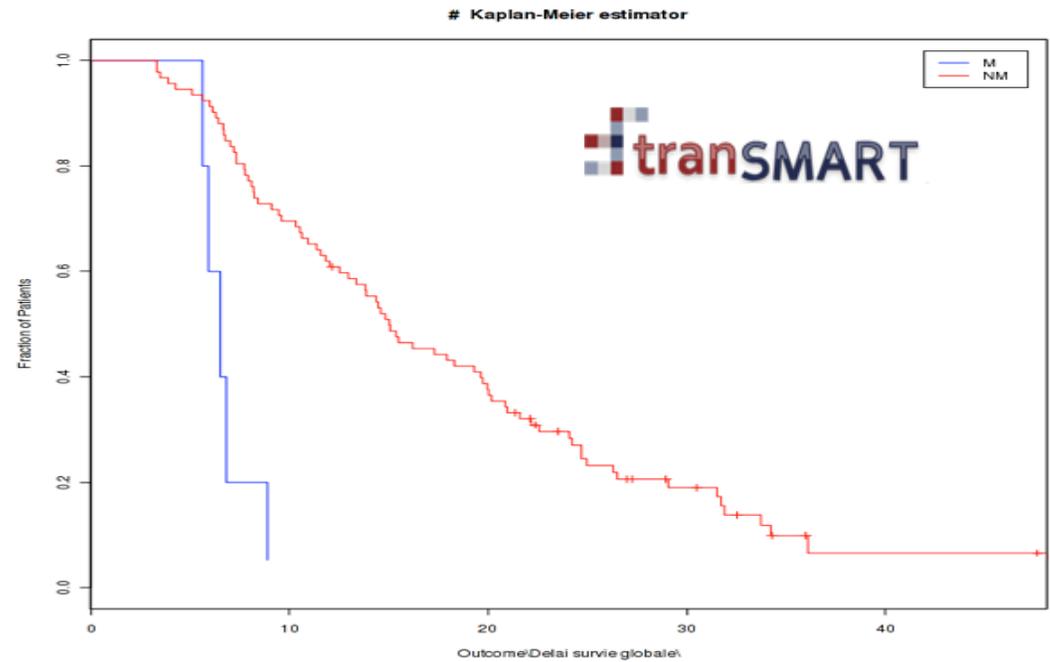

Select a variable on which you would like to sort the cohort and drag it into the box. For example, "Cancer Stage". If this variable is continuous (ex. Age), then it should be "binned" using the option below. This variable is not required.
